CONTENTS

Volume 18, Issue Nos 1–9

International Journal of
ENERGY RESEARCH

Issue No. 1 JANUARY

Modelling Heat Transfer in a Circulating Fluidized Bed: S. C. Bhattacharya and P. H. Luong 1

Attrition of Lignite Char in a Spouted Bed Combustor: P. Wongvicha and S. C. Bhattacharya 9

Continuous Lignite Char Combustion in a Spouted Bed: P. Wongvicha and S. C. Bhattacharya 21

Performance Analysis of a Drop-in-replacement Blend for CFC-12, CFC-502, and HCFC-22: S. M. Sami and P. J. Tulej 49

Economic Global Warming Potentials: M. K. Wallis and N. J. D. Lucas 57

Issue No. 2 MARCH

SPECIAL ISSUE
Advanced Transport Fuels
Proceedings of EC Conference: Palermo, October 1990

Invited Editorial: J. M. Bemtgen 63

Advanced Transport Fuels from Fossil Sources: Strategic Considerations: P. F. M. Paul, I. F. W. Romey and J. T. McMullan 65

Process Simulation and System Studies
Session Chairman: Prof. J. T. McMullan 69

The Production of Fuels from Biological Substrates: W. Dunne 71

Production Costs of Liquid Fuels from Biomass: A. V. Bridgwater and J. M. Double 79

Production Costs of Liquid Fuels by Indirect Coal Liquefaction: A. V. Bridgwater and M. Anders 97

Development of a Computer Package for the Calculation of Direct Coal Liquefaction Process Economics: S. H. Goldthorpe, P. J. I. Cross and J. M. Topper 109

Development of Computer Models for the Simulation of Coal Liquefaction Processes: B. C. Williams and J. T. McMullan 117

Summary of Discussions
Prof. J. T. McMullan. 123

Catalysis
Session Chairman: Dr P. F. M. Paul 125

Better Sulphide Catalysts through Optimized Active Phase-support Interaction: J. A. Moulijn, J. van Doorn, A. D. van Langeveld, P. J. Mangnus, S. Tajik, V. H. J. de Beer, N. Barthe-Zahir, S. M. A. M. Bouwens, J. N. M. van Gestel, E. M. van Ders, A. M. van der Kraan, M. W. J. Craje and D. W. C. J. M. Ranselaar 127

Heterogeneously Catalyzed Coal Hydroliquefaction: Screening of Catalysts and Characterization: J. A. Legarreta, P. L. Arias, I. de Marco, M. J. Chomón, B. Caballero, J. F. Cambra, B. Güemez and J. G. Fierro 145

Development and Evaluation of Iron Based Catalysts for the Hydroliquefaction of Coal: R. Bacaud, M. Jamond, M. Diack and R. Gruber 167

Competitive Interactions in Catalytic Hydroprocessing of Middle Distillates: S. Ali, D. Chadwick, E. Jorisi and V. Kouyionas 177

Development and Screening of Selective Catalysts for the Synthesis of Clean Liquid Fuels: J. J. F. Scholten, Xu Xiaoding, C.-B. von der Decken, B. Höhlein, D. Mausbeck, J. R. H. Ross, J. Slaa, U. Hoffmann, U. Kunz and H. Stölting 185

Catalyst Development for Selective Conversion of Syngas to Mainly Aromatic Hydrocarbons: M. Baerns, N. Guan, E. Körting, U. Lindner, M. Lohrengel and H. Papp 197

Catalytic Hydroliquefaction of Coal Macerals: Comparison with Raw Coals: G. Djega-Mariadassou, D. Brodzki, A. Abou Akar, D. Cagniant and K. Miga 205

Liquefaction of Coals and Maceral Concentrates in a Flowing-solvent Reactor: J. R. Gibbins, A. F. Gaines, C.-Z. Li and R. Kandiyoti 215

New Zeolites in Fischer–Tropsch Synthesis: H. Hammer, M. Joisten, S. Lüngen and D. Winkler 223

The Potential of Hydropyrolysis as a Route for Coal Liquefaction: C. E. Snape, C. J. Lafferty, G. Eglinton, N. Robinson and R. Collier 233

Improved Hydrogenation Catalysts for Coal-derived Liquids: M. Koussathana, N. Vamvouka and X. Verykios 243

Summary of the Discussions
Dr P. F. M. Paul 251

Direct Liquefaction and Process Technology
Session Chairman: Prof. I. Romey 255

Transport Fuels from Two-stage Coal Liquefaction: A. Benito, V. Cebolla, I. Fernandez, M. T. Martinez, J. L. Miranda, H. Oelert and J. G. Prado 257

Measurements of Physical and Thermodynamic Properties of Products Obtained Through Direct Coal Liquefaction: A. Lauret, D. Richon and H. Renon 267

Evaluation of Coal Cleaning in Coal Liquefaction: S. A. Moore 277

Evaluation of Cokes as Filter Aids in Direct Coal Liquefaction: M. A. Jones, G. M. Kimber, R. Paß and I. Romey 287

One- and Two-stage Coprocessing of Coal and Petroleum Residues: W. Steedman, T. Flynn, W. Kemp, K. D. Bartle, N. Taylor and S. Wallace 299

Co-refining of Coal and Petroleum: New Analytical Methods and Results: K. D. Bartle, S. Bottrell, M. P. Burke, C. Jones, P. K. Louie, S.-L. Lu, J. Salvado, N. Taylor and S. Wallace 309

Influence of Temperature, Catalysts and Partial Pressure of Hydrogen on the Co-processing of Spanish Lignites: A. Fabregat, J. Salvado, J. Giralt, A. Moros, J. Font and F. Giralt . . . 317

Secondary Co-refining of Petroleum and Coal Distillates: K. Dohms, J. Langhoff, R. Löring, B. Strobel, M. A. Jones, G. M. Kimber and S. A. Moore 329

Summary of the Discussions
Prof. I. Romey 343

Issue No. 3 APRIL

Optimum Size of Base Load Generators for Growing Demand: M. S. Sodha, R. Chandra and S. Rana 345

Integrated Modelling of Material Flows and Energy Systems (MIMES): J. Sundberg and C.-O. Wene 359

A Two-point Method for Turbulent Pipe Flow Measurements: F. Wen and B. Gajdeczko . . 383

Conventional Chiller Performances: Simulation and Field Data: A. Beyene, H. Guven, Z. Jawdat and P. Lowrey 391

Climatic Model for Prediction of Below-grade Heat Loss: Influence of Elevation: P. Sobotka 401

CONFERENCE DIARY 421

Issue No. 4 JUNE

Combustion Kinetic Parameters of Thai Lignite Char: P. Wongvicha and S. C. Bhattacharya 423

Shape Factor for an Underground Vertical Infinite Cylindrical Structure: M. S. Sodha, R. L. Sawhney and A. Sengupta 431

Thermal Performance of Parallel Earth Air-Pipe System: M. S. Sodha, U. Mahajan and R. L. Sawhney 437

Self Freezing in an Initially Wet Porous Medium: R. Basu and M. A. Boles 449

Mathematical Model for Energy Planning of Rural India: S. B. Malik, P. S. Satsangi, S. C. Tripathy and R. Balasubramanian 469

Experimental Testing of a New Solar Dryer: C. Tiris, N. Ozbalta, M. Tiris and I. Dincer . . 483

Issue No. 5 JULY

On the Wind Energy Resource of Nigeria: R. 'Layi Fagbenle and T. G. Karayiannis 493

Heating and Cooling Potential of an Underground Air Pipe System: R. L. Sawhney and U. Mahajan 509

Energy Recovery in Municipal Swimming Pools: C. Hawthorne and J. T. McMullan 525

Problems Associated with Mechanical Refrigeration Based Heat Recovery Systems in Municipal Swimming Pools: C. Hawthorne and J. T. McMullan 541

ANNOUNCEMENT 559

CONFERENCE DIARY 561

Issue No. 6 AUGUST

Experimental and Numerical Study of Unsteady Non-periodic Wall Heat Transfer under Step, Ramp and Cosine Temperature Perturbations: K. A. Antonopoulos and F. Democritou . . 563

Modelling and Simulation of a Downdraft Rice Husk Gasifier: R. Chowdhury, P. Bhattacharya and M. Chakravarty 581

Estimation of Viscosity and Thermal Conductivity of R142b and R152a: K. Sivanandan and A. Mani 595

Performance of a Heat-pump Assisted Dryer: S. K. Chou, M. N. A. Hawlader, J. C. Ho, N. E. Wijeysundera and S. Rajasekar 605

Effect of Discharge Head on the Performance of a Solar Water Pump: K. Sumathy, A. Venkatesh and V. Sriramulu 623

BOOK REVIEW 631

Issue No. 7 SEPTEMBER

Thermophysical Relationships for Waste Heat Recovery using Looped Heat Pipes: N. J. Lamfon, M. Akyurt, Y. S. H. Najjar and O. M. Al-Rabghi 633

Sensitivity Analysis and Component Modelling of a Packed-type Liquid Desiccant System at Partial Load Operating Conditions: A. Y. Khan 643

Rotary Absorption System for Industrial Processes: S. B. Riffat 657

Chemical-foam Cleaning Processes for the Control of Power Plant Particle Erosion: M. A. Barrufet, R. W. Flummerfelt and H. L. Chen 665

Hydromagnetic Stability of Dissipative Couette Flow: Wide-gap Problem: V. M. Soundalgekar, M. A. Ali and H. S. Takhar 689

ANNOUNCEMENTS 697

CONFERENCE DIARY 699

Issue No. 8 NOVEMBER

Assessment of Thermal Discomfort in Non-uniformly Heated Enclosures: Two Indices in the Time–Space Domain: G. Cammarata, A. Fichera and L. Marletta 701

Performance of a Low Energy House in a Mild Cooling Season Part II: Thermal Performance of the Heat Pump: B. Ma and V. I. Ugursal 711

Prediction of the Condensation and Boiling Characteristics of R12 Substitutes R22/R152a/R114 and R22/R152a/R124 Inside Enhanced Surface Tubing: S. M. Sami, J. Schnotale and J. G. Smale 727

Transient Temperature Distributions in Spherical and Cylindrical Food Products Subjected to Hydrocooling: I. Dincer 741

Forced Convective Condensation and Boiling of Ternary Non-azeotropic Refrigerant Mixtures Inside Water/Refrigerant Enhanced Surface Tubing: S. M. Sami, P. J. Tulej and B. Song 751

Shrinkage of Liquid CO_2 Droplets in Water: Y. Fujioka, K. Takeuchi, Y. Shindo and H. Komiyama 765

Issue No. 9 DECEMBER

Unsteady Hydromagnetic Free Convection Flow with Hall Current Mass Transfer and Variable Suction through a Porous Medium near an Infinite Vertical Porous Plate with Constant Heat Flux: Md. Abdus Sattar 771

Simultaneous Measurements of Thermal Conductivity and Thermal Diffusivity of Insulators, Fluids and Conductors using the Transient Plane Source (TPS) Technique: A. Maqsood, N. Amin, M. Maqsood, G. Shabbir, A. Mahmood and S. E. Gustafsson 777

Estimating the Agricultural Demand for Natural Gas and Liquefied Petroleum Gas in the Presence of Measurement Error in the Data: N. D. Uri 783

Numerical Prediction of Refrigerant Mixtures Condensation inside Enhanced Surface Vertical Cylinders: S. M. Sami, Y. Zhou and M. Allam 799

Gas Dynamic Design Optimization of the MHD Generator: R. Decher 813
